

RECURRENT DEEP GENERATIVE STOCHASTIC NETWORKS

Markus B. Beissinger

A THESIS

in

Computer and Information Science

Presented to the Faculties of the University of Pennsylvania in Partial Fulfillment
of the Requirements for the Degree of Master of Science in Engineering

2014

Lyle H. Ungar
Supervisor of Thesis

Val Tannen
Graduate Group Chairperson

Acknowledgements

I would like to thank Lyle Ungar for his insights throughout advising this thesis. I would also like to thank Mark Liberman (CIS, Linguistics, University of Pennsylvania) for his work on the thesis committee. Finally, I would like to thank Li Yao (Computer Science and Operations Research, Université de Montréal) from Yoshua Bengio's group for the Theano framework and help with starter code.

Abstract

This is the abstract.

Contents

1	Introduction	1
1.1	new section	1
2	Related Work	2
3	Background	3
4	General Methodology: Deep Generative Stochastic Networks	4
5	Model 1: (alternating)	5
6	Model 2: (joint)	6
7	Discussion	7
8	Conclusion	8

Chapter 1

Introduction

THis starts a chapter

this is a new par?

1.1 new section

what does this look like?

hiya there.

Chapter 2

Related Work

Chapter 3

Background

Chapter 4

General Methodology: Deep Generative Stochastic Networks

Chapter 5

Model 1: (alternating)

Chapter 6

Model 2: (joint)

Chapter 7

Discussion

Chapter 8

Conclusion
